Mohammed Shajahan

Full Stack Engineer · Web & Mobile · GraphQL & AI Integration

Kerala, India | +91 75618 28369 | hello.mohammedsh@gmail.com | mohx.art | LinkedIn | GitHub

Full Stack Web and Mobile Engineer with hands-on experience building SaaS products using the modern TypeScript ecosystem. Experienced in shipping production-ready features across web and mobile, with a strong focus on scalable architecture, AI-powered integrations, and product development.

Education

Master of Computer Applications (MCA)
Lovely Professional University · Online August 2026 – Present
AI & Machine Learning Specialization

Bachelor of Computer Applications (BCA)
Indira Gandhi College of Arts and Science, Ernakulam · Mahatma Gandhi University August 2021 – May 2024
Additional Coursework: Artificial Intelligence and Machine Learning

Experience

Full Stack Developer
Arcanum Information Technology | Hybrid August 2026 – Present

- Developing an RMS platform supporting multi-level business operations across holding companies, brands, outlets, POS, and digital menu systems.
- Building full-stack features using **TanStack, Express.js, PostgreSQL, Oracle, SQLite,** and **Turso** across web applications and backend services.
- Working with tenant-based database architecture across Oracle and PostgreSQL, with SQLite/Turso caching and synchronization workflows.
- Developing **Rust** services for specialized workflows, including thermal and label printer integrations, while guiding junior developers through task planning and implementation.

Full Stack Developer
IOTypes | Remote June 2024 – July 2026

- Developed SaaS products using **Vite, Next.js**, **Expo**, **GraphQL**, **PostgreSQL**, and modern TypeScript tooling.
- Built full-stack features across web and mobile applications, backend APIs, authentication systems, and deployment workflows.
- Developed backend services using Hono.js and Elysia.js with PostgreSQL, Prisma, Drizzle ORM, Kysely, OpenAPI, Bun, Deno, and Cloudflare Workers.
- Implemented **monorepo-based architecture and modular backend patterns** for scalable product development.
- Integrated **AI-powered product features** using Vercel AI SDK, Google AI SDK, OpenAI API, and Cloudflare Workers AI.

Software Development Intern
Steyp | Kochi, Kerala, India September 2020 – October 2023

- Completed project-based training in full-stack web and mobile application development through Steyp's engineering learning program.
- Built full-stack web and mobile applications using React, React Native, Python, Django, REST APIs, and modern JavaScript tooling.
- Gained practical experience through hands-on projects, mentorship, and collaborative development workflows.

Skills

- **Languages:** TypeScript, JavaScript, Python, Rust, C++
- **Frontend & Mobile:** Svelte, SvelteKit, React, Next.js, React Native, Expo, TanStack, Tailwind CSS, shadcn/ui
- **Backend & APIs:** Axum, Tokio, Node.js, Hono.js, Elysia.js, Express.js, GraphQL, REST APIs, OpenAPI
- **Databases & ORM:** PostgreSQL, Oracle, MongoDB, SQLite, Redis, Drizzle ORM, Prisma
- **AI & LLM:** OpenAI API, Vercel AI SDK, Google AI SDK, Cloudflare Workers AI, RAG, MCP
- **AI Development:** Codex, Claude Code, AI-assisted development, Agentic Workflows
- **Infrastructure:** AWS, Docker, Kubernetes, Nginx, Caddy, GitHub Actions, CI/CD, Linux, Git

Projects

Nymveil | SvelteKit · Hono · Cloudflare — In Progress | Source

- Building an open-source email identity and routing system for isolated custom-domain addresses with expiration and revocation controls.
- Designing a modular architecture separating domain logic, persistence, authentication, notification providers, and Cloudflare infrastructure.

Papermint | Rust · Printing Infrastructure · Open Source — Source | Docs

- Built and published a Rust-based printing library with layered architecture for receipt layout, printer dialect encoding, and hardware transport.
- Designed a multi-crate Cargo workspace with Node.js/TypeScript bindings and an Axum/Tokio HTTP print daemon supporting web and mobile integrations.

Drizzle Redis Cache | TypeScript · Redis · Drizzle ORM — Source | NPM

- Built and published an open-source Redis cache adapter for Drizzle ORM supporting Node.js and Bun runtimes.
- Implemented distributed-safe cache invalidation using Redis Sets and table-level dependency tracking.
